**Author**      **Topic: Page directories/tables frame location**

**adhanas**      Tue Mar 25 13:57      [who](#)

---

Are the frames 1024-1535 exclusive for page directories and tables alone or can that be used (if they happen to be free) for data pages too?

**wzhang27**      Tue Mar 25 21:36      [who](#)

---

if they happen to be free, you could store other data there, in our test cases, we may use that range

**aperugu**      Thu Mar 27 0:30      [who](#)

---

What should happen if there is no space for creating a new frame in frames 1024-1535?

**wzhang27**      Thu Mar 27 9:43      [who](#)

---

then don't use that range.
